ABOUT RAGHU ENGINEERING COLLEGE:

Located in the lush green outskirts of the city of destiny Visakhapatnam, and established as the brainchild of the renowned academician Sri Raghu Kalidindi in year 2001, Raghu Engineering College is sprawling across over 50 acres of campus area and is perched on NH-43 in dakamarri village, Bheemunipatnam mandal, and is just 37 kilometers from Visakhapatnam, less than 15 kilometers from Vizianagaram and is only 5 kilometers from Thagarapuvalasa. The college is approved by AICTE New Delhi and is permanently affiliated to JNTU-K and is also accredited by NBA and NAAC with “A” Grade and was given the status of Autonomous in the year 2017 by UGC.

ABOUT RAGHU ENGINEERING COLLEGE:

RAGHU Engineering College, established in the Academic year 2001-2002 with the approval of All India Council for Technical Education, New Delhi and Govt. of Andhra Pradesh, accredited by NBA, accredited by NAAC with 'A' grade. The college has been sanctioned 'Autonomous' status by the UGC and is permanently affiliated to the Jawaharlal Nehru Technological University, Graded AAA by Careers 360. Ranked 63rd among top 100 private engineering colleges in India by Higher Education Review Magazine. Ranked 14th among top 32 promising engineering colleges in India by GHRD.

Department of Electronics and Communication Engineering of Raghu Engineering College is one of the best branches in the college and also in the entire district. Our eminent faculty and well equipped art of technological laboratories established by the management supports us to remain in top.

Schedule of F.D.P:

CONTENTS:

- Impact of EM Scattering and Radiation.
- Computational Algorithms.
- Beam forming Techniques for Wireless Communication.
- Development of Smart Antenna Systems.
- Multi Carrier Modulation.
- OFDM, Multi tone and Modal Modulation.
- Thrust Research Areas in 5G

SCOPE OF F.D.P

- 01**

The theme of this program will overview about broadband communications over wireless and wire-line, which has been made possible by Multi Carrier Modulation (MCM) and Multiple Input and - Multiple Output(MIMO). This program provides a fundamental understanding of the underlying concepts of MCM and MIMO as well as a brief overview of its applications in LTE 4G and 5G, Wi-Fi 802.11 series.
- 02**

This program covers set of supporting algorithms needed for constellation mapping, tone loading, gain scaling, and rate adaptation procedures to realize them in processors, DSPs and analog front ends. As a part of technology challenges, this program will also deliver the state-of-the-art research on the most favorable types of beam-forming techniques will be reviewed in detail. Comparison of different beam-forming techniques with MATLAB codes will be given.
- 03**

This program highlights the real-world electromagnetic problems like electromagnetic scattering, electromagnetic radiation, modelling of wave-guides etc., are not analytically calculable, for the multitude of irregular geometries found in actual devices. This program will discuss about computational numerical techniques. This makes Computational Electro-Magnetics (CEM) important to the design, and modelling for all 5G related applications like modeling antenna, RADAR, etc.

ABOUT KEYNOTE SPEAKER

Dr. Ravishankar, since 1979 for a span of 32 years he was employed in development activities across three Industries. For the first 20 years he was with the Satcom Lab of Indian Telephone Industries, Bangalore, where he was intensively involved in the complete development cycle from design, engineering, prototyping and customer approval of VSAT Offset Reflector Antennas, FMSCPC-Modems and Intermediate Data Rate (IDR) Digital Modems with Digital voice Multiplexer – Demultiplexer for VSAT applications. Thereafter for the next 12 years, he worked in the Broadband DSL wireline signal processing domain as a DSP systems Engineer on DSL Modem Chipsets with two US based Companies viz; Texas Instruments and Centillium Inc.

Dr. Ravishankar has been associated with ECE Department of R V College of Engineering since 2004. He has successfully guided Eight PhD's under the auspices of VTU, and he continues to guide 6 more staff members under VTU.

Types of Actuators

- Electric Motors
 - Servomotors
 - Stepper motors
 - DC Motors
- Hydraulic actuators
- Pneumatic actuators

Mostly speed of DC motors is controlled using pulse width modulation (PWM)

Stepper motors utilize multiple teeth on a central gear to define position.

DEPARTMENT OF CIVIL ENGINEERING

Report on GUEST LECTURE BY DR.T USHA MADHURI , ASSOCIATE PROFESSOR OF CIVIL ENGINEERING
ANDHRA UNIVERSITY

Date: 10/07/2019

Organized for – ALL B.Tech (C.E) students, NCC AND NSS UNITS

Venue- REC SEMINAR HALL

Name of coordinating persons - FACULTY OF CIVIL ENGINEERING DEPARTMENT, NCC AND NSS UNITS

Department of Civil Engineering of REC organized a Guest Lecture on "EFFECTS OF ENVIRONMENTAL POLLUTION" as a part of MEGA POLLUTION AWARENESS PAKHWADA: NATIONAL LEVEL

On 11th July 2019 from 9:00 AM to 10:00 AM in REC Seminar Hall. The guest lecture gathered eminent speaker Dr. T Usha Madhuri, Associate Professor of Civil Engineering Department, University College of Engineering Andhra University. The lecture was attended by 120 students and 11 faculty members of Civil Engineering Department along with NSS AND NCC Coordinators and Cadets

In this lecture Dr. T Usha Madhuri discussed Various Topics related to Effects of Environmental pollution. She has also introduced the participants to many exclusive examples and challenges in the world with reference to different pollutions in the environment. She also shared her own experiences with the above said problems which had been very helpful and informative session.

Dear Sir,

On behalf of Department of Civil Engineering of Raghu Engineering College we hereby request you to Conduct One-day Workshop on Concrete Technology on 11.02.2020. Please make yourself available on that day. We are heartfully expecting your gracious presence and your valuable lecture. Please give the acknowledgement of this email as well.

Regards,
Head of Department,
Raghu Engineering College,
Visakhapatnam.

Report On

Training on "Fire Safety Measures in Work Place" for Teaching and Non-Teaching Staff
by Mr. V. Likhith Mohan

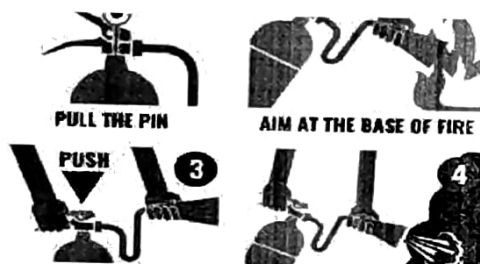

Objective of the Programme:

- To Know the proper type and use of fire extinguishers
- To Know the fire safety management plan and evacuation procedures;

Organized by: Department of EEE

Report:

The goal of this programme was to increase awareness of workplace fire safety threats and procedures among Raghu Engineering College's teaching and other non-teaching staff members. The relevance of fire safety procedures and the use of fire extinguishers in laboratories and corridors was explained by Mr. V Likhith Mohan. This training increases understanding of how to use fire safety equipment and helps teaching staff, lab technicians, and non-teaching staff use fire safety equipment when unsafe occurrences occur.

The training program was inaugurated by Dr. R. Vaikunta Rao, Head of the Department, Department of Mechanical Engineering. In his inaugural speech, Dr. R. Vaikunta Rao inspired the participants to make use of the training programme to the maximum extent possible in order to enhance their knowledge in “I.C. Engines” and develop skills.

During the first session of the workshop, Mr. K. Mohan Kumar made a presentation on fundamentals of “I.C. Engines”. After the presentation, Mr. K. Mohan Kumar explained conducting of various experiments, applications and safety precautions to the participants. In the second session, participants conducted the experiments and their performance was evaluated.

During the first session of the workshop, Mr. J. Ramesh Naidu demonstrated various parts of the lathe machine, how they work, the preventive and shut down maintenance under various conditions of failure of the equipment. After the demonstration, the participants were given a few tasks on these areas and their performance was evaluated and necessary feedback on how to improve these skills was given.

In the second session, a presentation on the applications of the machine was told. This was followed by testing of participants' understanding on some of the given topics. In the last session, the resource person gave some useful information and tips on the actual doing of the job and the participants were asked to work on the machine and do the job making use of the tips and following the guidelines given.

Report on A workshop on "Introduction to Multisim" for Technicians and Non-Teaching Staff by Mr. K S Ravi Kumar

Aim of the Program:

1. To create awareness on Multisim Tool and its Significance.
2. To Create Practical Exposure of Multisim Tool by using Simple Electronic Circuits.

Report:

Multisim is an Electronic Schematic Capture used to Connect and Simulate Various Electronic Circuits. It is a Software Simulator that provides interactive Schematic environment to instantly visualize the Electronic Circuit Behavior. Multisim helps the designer to reduce PCB Circuit iterations and reduce development costs. It is important to have the exposure of this in analyzing the circuit functionality. Keeping this in View a workshop is arranged for Technicians and non-teaching Staff in the Department of ECE. Mr K S Ravi Kumar, Associate Professor in the Department of ECE given Introduction on this tool and focused on practical design and analysis of Simple Electronic Circuits using Multisim and Plot time domain analysis graph and frequency response graph.

Training on: Understanding the Nature of Work & Sharing of Work

Date: 01/06/2019

Resource Person: Mr. Y. Venkata Rao

Objectives:

1. To bring a sense of brotherhood and bonding among staff
2. To explain the complex nature of work

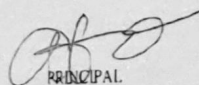

Report:

Mr. Y. Venkata Rao stressed upon that the maintenance of equipment is as important as using it. Take the example of word processors and photocopiers. What will happen if the machines remain out of order most of the time? We can neither build up fresh data nor use the data already stored. Failure of machines is mostly the result of the failure of human beings in maintaining them. In such cases, the more traditional ways of keeping records prove to be more useful and effective. Ironically instead of improving efficiency and saving time, sophisticated machines make people less efficient and cause inordinate delays in situations where the use of technology is not properly understood or socially internalized. Similarly, we can see all equipment such as computers, printers etc., left uncovered and unprotected against dust and damages. It is also not unusual to leave a machine on and forget about it the whole day long. A fan or a cooler too is a machine – how many of us care to switch them off when we leave our rooms at the close of the day?

Similarly, lab technicians are also reminded of their duties in the laboratories in the upkeep of the regular as well as research lab equipment.

Training in: Student Care

Date: 04/01/2020

Resource Person: Mr. U. Sarat

Objectives:

1. To bring a sense of brotherhood and bonding among staff
2. To explain the complex nature of work

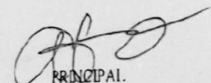

Report:

The profile of students being very diverse and different in the dealing with them in an appropriate manner is essential. Mr. U. Sarat has indeed impressed upon the non-teaching staff about this fact. Students and others who come to a institution come with a specific purpose to learn and study. Some of them travel long distances, sometimes thousands of kilometres, spending time and money to get their problems solved at the institution. Naturally, they expect us to attend to their problems immediately. What will be their impression about the institution, if they do not get a proper treatment and the right answers? We may not be able to give them right answers sometimes, but we can talk to them politely, share their concern and guide them to meet people who would advise them. After all, the image of an institution depends on the impression the students and the public form about it. Similarly, sometimes one writes a letter or makes a telephone call asking for some special information. We should try to help one to the best of our ability. Rude replies are signs of lack of culture. An empathetic reply and polite words would make the other person feel happy even if he/she does not get the right answer.

In the current education system, students look for 'gentle treatment' precisely because they miss the human factor. If students do not get immediate feedback, they have lots of questions to ask whenever they write to us or happen to meet us in our offices. It is possible that some of the staff may feel bored to answer routine questions especially when they do not have solutions. In fact, we should anticipate certain problems which should defy immediate solutions in spite of our best efforts and intentions to solve them, and be ready to look for different solutions without getting panicky. If they are insistent, we may sometimes even ignore their queries or give rude replies to them. Such behavioural traits, if we possess them, will not help the students, nor the institution nor our own growth in our careers. As professionals, we should appreciate their problems and anxieties, and try to help them in every possible way, instead of becoming impolite and rude when faced with genuine questions from them. The role of non-teaching in the context is very important, as they are there to provide a human staff touch to an otherwise mechanical operation.
