Code: 17CE461

0 0 2 2

MINI PROJECT -I (SURVEYING)

Prerequisite: Basics of Surveying

Basics of surveying like measurement of areas, preparation of contour maps.

Guidelines:

Students should select an area to conduct surveying work in the vicinity of their home/college.

Students have to study Journal papers relevant to their area of interest and prepare a write up.

Students should conduct experiments to study and measure the required quantities in the selected area and usage of advanced surveying equipment is preferred.

Evaluation will be based on relevant topic student has studied, communication skill and report he/she has prepared.
